

Killer Bee / Sweden

The 90's 3 albums, 5 singles and as many videos. Traditional hard rock of the truest kind. Their never say die attitude and shows all over the world between 1992-1998 from the RED SQUARE & OLYMPIC STADIUM in Moscow, to performing in festivals together with artists such as OASIS, R.E.M, ELTON JOHN, ROD STEWART, PAGE & PLANT, MEGADEATH, PETER FRAMPTON. KILLER BEE were well on their way but situations beyond the control of the band would lead to an eventual 12 years of silence... A time needed to refuel and get back on track.

2010 - The release of "Almost There" was a self proclaimed salute to days gone by. A chance for the listener to hear a compilation of songs that best represented them from their earlier releases. This Cd opened the eyes of past fans and sparked a new driving force which led the two towards this new era of KILLER BEE. 2012 - "From Hell and Back" a suitably titled comeback album was released throughout Europe and across the web. Well received with a positive response, the album was followed by no less than 5 videos to the songs All Night Long, Step Into My World, I Believe, Footprints In The Sand and finally From Hell and Back . The videos distributed online received an enormous near 1,000,000 combined hits

2013 - One year later hot on the heels of From Hell and Back, KILLER BEE once again delivered a new kick-ass Album - "Evolutionary Children" followed by the videos "Children Of The Evolution" and "Scream It".

Once again the band received great response around the world.

2015 - The official launch of the KILLER BEE in North America with the release of "Rock another Day" and the addition of guitar legend Paul "Tonka" Chapman (Formerly of UFO, Skid Row, Lone Star etc.) KILLER BEE embarked on a 9 week tour of North America taking them across the continent playing a total of 40 cities in 35 states and parts of Canada. As 2015 winds down KILLER BEE are currently in Sweden putting the finishing touches on their newest record with expectations of a release in early 2016.

2016 - It's an open calendar. Tours are being planned now for North America, Europe and Asia. A new record is coming in the spring. In February KILLER BEE hit the road for the first leg of a North American tour hitting an estimated 15 cities. The road that lies ahead is wide open and that's where you will find Killer Bee. Wide open full throttled pedal to the metal rocking in a city near you.
